

Klima Unico - 3 in 1

Penetrating Isolator + Sealer + Topcoat - all in the one product

High Performance Water Based Coatings
For Exterior Timber

Klima UNICO

A long lasting, highly efficient and easy to use water based exterior coating for contractors, manufacturers and maintenance professionals.

Unico penetrates deep into the wood to protect against tannin migration, insects and mould while also providing excellent protection from dirt, weather and UV light. Traditionally three specialised products would be required to achieve this premium level of protection, yet the patented resins and nanotechnology inside Unico mean it can all be done with just one easy to use product.

Unico is fast drying and allows for rapid application so an outstanding finish can be achieved in very little time. Unico is very Low VOC, so you can be assured that you are making a wise choice for the environment.”

- BRUSH, ROLLER OR SPRAY,
- EASY APPLICATIONS ON VERTICAL AND HORIZONTAL SURFACES
- FAST DRYING MONO COMPONENT
- U.V. RESISTANT
- WATER BASED FOR EASY CLEAN UP
- ENVIRONMENTALLY FRIENDLY
- LONG LIFE AND COLOUR STABILITY
